

The Willcox Hotel is committed to minimizing our overall impact on the environment without

sacrificing the comfort and enjoyment of our guests.

We strive to conserve water and energy, reduce greenhouse gas emissions, improve air quality and minimize waste. We educate our employees and suppliers about the importance of environmentally respectful conduct and have an environmentally preferred purchasing policy in place.

As part of the South Carolina Green Hospitality Alliance, we report regularly on our progress in implementing these policies and achieving our environmental goals.

People have come to The Willcox for more than a century to enjoy the highest level of service and the beauty of our surroundings. We are committed to preserving this rich legacy for generations to come.
